# **ANNUAL REPORT ON PROVIDERS**

## **2025**

A UTAH STATE BOARD OF EDUCATION TECHNICAL ASSISTANCE  
DOCUMENT

January 2026

# Introduction

The Statewide Online Education Program (SOEP), established under Utah Code 53F-4 Part 5, is a legislative initiative designed to give Utah students access to online coursework. The program ensures educational opportunities are available to students regardless of the resources at their local school. The USBE is responsible for leading the required annual performance reporting to maintain the program's accountability and transparency.

## Annual Performance Report on Providers 2025

### Statewide Assessment Scores

Aggregated scores from statewide assessments taken by students completing online courses.

Figure 1: Aspire Plus Proficiency Rate by Provider

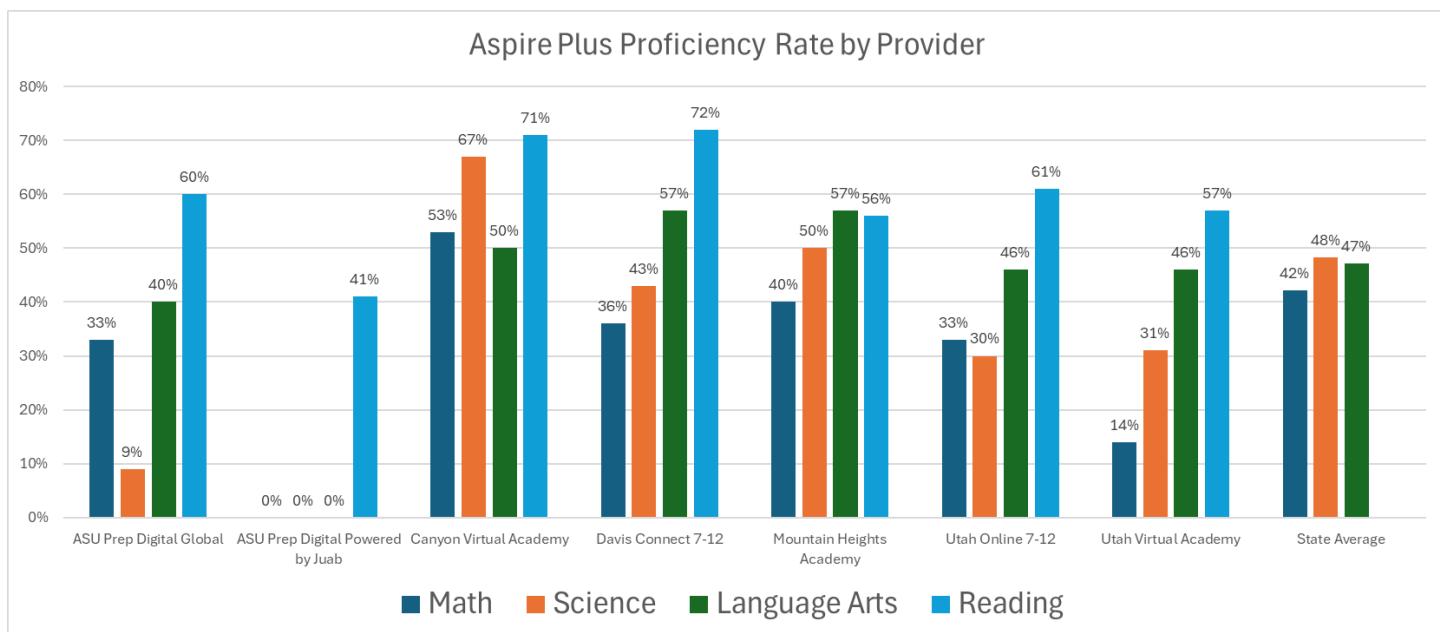

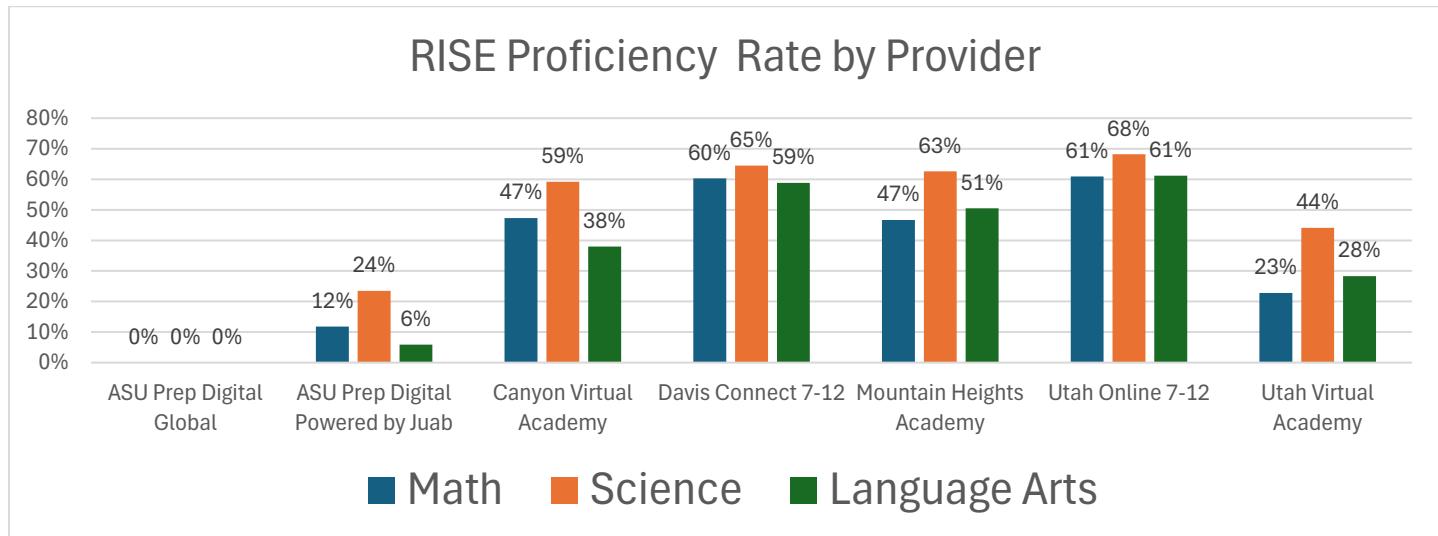

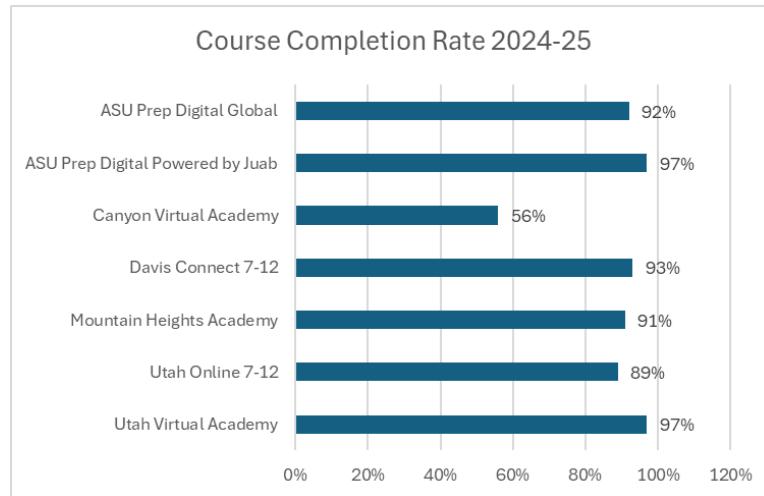

Figure 2: RISE Proficiency Rate by Provider

## Course Completion Rates (Timely)

Percentage of students completing courses within the specified time.

Figure 3: Course Completion Rate 2024-25

## Course Completion Rates (Extended)

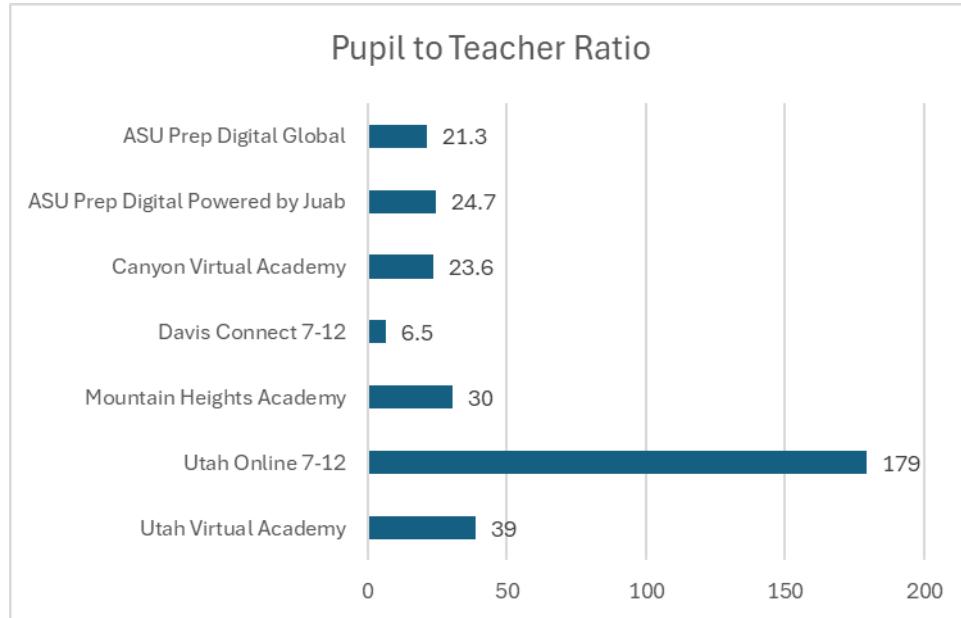

Percentage of students completing courses after the standard time but before high school graduation. No Online Providers had students with a late pass for the 2024-25 school year.

# Pupil-Teacher Ratio

---

The combined pupil-teacher ratio for all online courses offered by the Online Provider.

Figure 4: Pupil to Teacher Ratio

# Student Grade Distributions

---

Grade distributions (GPA) for each course offered by the Online Provider.

Table 1: Grade Distributions (GPA) for Each Course Offered

## Satisfaction Survey Results

Outcomes from student and parent satisfaction surveys. A survey has been completed and will be sent out after course completion for the 2025-26 school year.

# Improvement Plan Summary

---

A survey was sent to all Online Providers to gain insight into their plans for improvement. Their responses are summarized below.

## ***CANYONS VIRTUAL ACADEMY (CVA)***

CVA focuses on improving rigor through curriculum development. They require extensive and rigorous course creation for new content and provide regular targeted Professional Development (PD) for teachers.

CVA has implemented Online Proctoring, Customized Curriculum Content (teacher-created), and Plagiarism/AI Detectors. Their plan centers on migrating most of their courses to fully customized, program-created content within the next two years.

## ***DAVIS CONNECT (DC)***

DC enhances course quality and student outcomes through a layered approach to staff development and instructional rigor. Their staff regularly participates in specialized PD, including Equal Opportunity Training to ensure every student feels valued, supported, and seen- no matter their background or learning needs. DC offers ongoing support for English Language Learners, as many teachers are working towards their ELL endorsement. They implemented the High Reliability Schools (HRS) framework to create supportive environments and ensure effective teaching practices. Teachers engage in individualized instructional coaching, including cycles focused on teaching strategies, student engagement, and technology use. Furthermore, teachers present and participate in major conferences, such as the Utah Virtual Learning Collaborative (UVLC), the Digital Learning Annual Conference (DLAC), the Utah Coalition for Educational Technology (UCET), and conferences offered by the Utah State Board of Education.

To ensure rigor and integrity, Davis Connect has implemented online proctoring, plagiarism/AI detectors, and integrated Project-Based Learning across its courses. They develop customized curriculum content created by Utah-certified educators and gather end-of-course student surveys for continuous improvement.

Moving forward, DC is focused on expanding CTE course opportunities, adding more courses, and developing stronger communication systems. They are also incorporating age-appropriate lessons on Responsible AI use for students, centering every improvement on fostering student growth in the best possible online environment.

## ***INNOVATION ONLINE (IO)***

IO supports its teachers primarily through monthly faculty meetings, professional learning days, and membership in the Online Learning Consortium (OLC), which provides access to on-demand resources for online learning and improving course quality. IO has implemented Project-Based Learning, customized curriculum content, and plagiarism checkers in its online courses.

Their primary focus moving forward is crafting the next school year's success plan in tandem with their professional learning goals, ensuring that training directly impacts student outcomes.

## ***MOUNTAIN HEIGHTS ACADEMY (MHA)***

MHA's dedication to enhancing course rigor and improving student outcomes is executed through structured, data-driven collaborative meetings, and teacher professional development. Teachers participate in frequent, structured professional development, including three annual training courses and twice-quarterly Grade Band Meetings where data is analyzed to set cross-curricular goals and share best practices in teaching and curriculum development. Monthly department meetings provide specialized PD based on needs, test scores, pass rates, and student success strategies. Weekly course collaboration meetings further refine content by examining student engagement, assignment completion percentages, AI resistance, and Universal Design for Learning (UDL) principles. This approach is supported by teacher-created, customized content that enables assignment tiering.

Furthermore, MHA ensures quality and integrity by utilizing online proctoring and plagiarism/AI checkers. They centralize resources in a Teacher Instruction Document that supports grading calibration for teachers, acts as a centralized place for course improvements, provides tools for special education staff to assist students, and provides evidence that standards are being met.

## ***UTAH ONLINE SCHOOL (UOS)***

UOS supports and enhances course quality and improves student outcomes by including funding for teacher attendance at national conferences and providing in-house professional development focused on course design, collaboration, authentic assessments, teacher websites, communication with parents and students, understanding and implementing Individualized Education Plans, verbal pre-testing, scaffolding, providing student support and interventions, and re-teaching.

To enhance rigor, UOS has implemented online proctoring, integrated Project-Based Learning, developed customized curriculum content (teacher-created), and utilizes plagiarism/AI checkers in its online courses.

## ***UTAH VIRTUAL ACADEMY (UTVA)***

UTVA enhances course quality and improves student outcomes by teachers engaging in targeted, job-embedded professional learning fully aligned with their School Improvement Plan (SIP) and Personalized Competency-Based Learning (PCBL) framework.

Key PD focus areas include monthly PLC cycles utilizing data dashboards to monitor mastery and share assessment strategies, along with UEN AI Fluency Training focused on 21st-Century teaching skills. Staff development is deepened through Solution Tree PLCs, the UEPC Teacher Leadership Institute, and department-specific statewide PD. Training is provided on diversified assessment methods (projects, retakes, capstones), Canvas + Delphi mastery tracking, and metacognition strategies to boost learner agency. Additionally, UTVA supports individualized teacher growth through tuition/conference reimbursement and book studies. All professional development is monitored quarterly via walkthroughs, student outcome data, and teacher feedback to ensure a direct impact on course completion, mastery demonstration, and graduation rates.

To ensure rigor and integrity, UTVA has implemented several key strategies: UTVA has developed customized curriculum content (teacher-created, not platform-driven) and implemented a consistent online course framework with progress tracking to support PCBL. This includes integrating Project-Based Learning (PBL) and diversified assessment methods to empower students in demonstrating mastery aligned to the Utah Core Standards. Online proctoring and academic integrity tools (AI detectors/plagiarism checkers) are utilized across courses. Furthermore, a Tiered Mentor Intervention System has been developed to provide weekly support for high-risk students, and all outcomes are monitored quarterly via data dashboards and PCBL implementation rubrics and walkthroughs.

## **Audit Results**

---

Results of any sample audits conducted by the state board on the Online Provider's courses.

During monitoring visits, USBE conducts audits of the courses offered by Online Providers. As part of this process, each Online Provider must supply evidence—such as a crosswalk document, curriculum map, or LMS demonstration—that their courses align with the Utah Core Standards.

Monitoring visits conducted in the Spring of 2025 confirmed that all reviewed courses were fully aligned with the Utah Core Standards.
