

Mandt De-Escalation Training

Spring 2025 – New Certification

The Mandt System® is a comprehensive, integrated approach to preventing, de-escalating, and if necessary, intervening when the behavior of an individual poses a threat of harm to themselves and/or others. The focus of the Mandt System® is on building healthy relationships between all the stakeholders in human service settings in order to facilitate the development of an organizational culture that provides the emotional, psychological, and physical safety needed in order to teach new behaviors to replace the behaviors that are labeled “challenging”.

MIDAS Registration is **REQUIRED** to attend the new certification course. Each new certification training section has a maximum of 20 participants. Re-licensure points are available for each training.
